# Why Choose Leekes?

Award winning family owned business trading for over 120 years

Well appointed studios: see our products before you purchase

All of our windows are made in our own British factory

Lowest Price Guarantee† means we won't be beaten on price on proven quotes

Knowledgeable and experienced staff

90% of our customers recommend us and we are rated as excellent on Trustpilot▲

Industry accredited: FENSA, GGF & TrustMark

Affordable payment options including Interest Free Credit# promotions

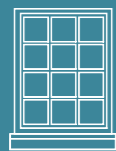

Complete 360° service: design, planning, survey, and aftercare service

Leekes is an award winning independent family business which has been helping customers to create beautiful homes since 1897. Our home department stores are fully equipped with some of the largest Conservatory and Window studios in the UK and are located in Llantrisant, Cross Hands and Melksham.

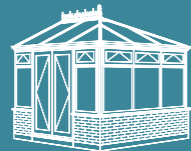

We also have studios in garden centres in Hereford, Swindon and Thornbury and at Park Furnishers in Bristol. Our showrooms offer an opportunity to see finished displays, which are full size and fully furnished, allowing you to touch and feel the product before purchasing. Unlike many of our competitors, our stores and studios operate extended opening hours enabling you to visit us throughout every stage of your project with our friendly staff available, face to face, to help at any time.

With over 120 years of trading history, we bring a wealth of experience and strong customer service values to each installation we undertake.

Our trained teams of surveyors will take care of planning permission and building regulation approvals when relevant to your project. Our expert fitters and workmen are trained to be clean and efficient to minimise disruption during the installation as we realise any building or home improvement project can be a stressful time in any home. Our aim is to complete your installation to the highest standard and as professionally as possible in the time frame agreed.

Leekes fit over 10,000 windows every year

Leekes build over 400 conservatories every year

The Leekes Group employs over 1000 people with a turnover of more than £100 million

# Leekes Windows: Made by us in our own factory

We pride ourselves on offering our customers the very best products the industry has to offer. For years we used premium suppliers for our windows, but wanted the opportunity to offer our customer bespoke products that are built to their own specification which is why in 2018 we decided to develop a purpose built manufacturing facility in partnership with Modplan, right here in the UK.

We chose to partner with the world's best profile manufacturer, Veka. They are world leaders on uPVC recycling and, although our windows are made using virgin plastic, we know that every scrap of uPVC product is sustainably recycled and not placed in landfill. We truly care about the future and are doing everything we can to make sure our environmental impact is as small as possible. We also recycle all glass, metal and timber products. Earth and ground waste is also sustainably managed.

We have the very best components fitted to our windows to give our customers complete peace of mind. Yale offers the best all round product and guarantees with all the important parts that can wear over time guaranteed for 10 years.

With the world's best profile manufacturer in Veka, a UK leading frame fabricator in Modplan, the UK's number one brand for security with Yale and premium products with fixings, sealants, glass and trims – all made in our very own factory close to our head office – we are confident that we offer a first class window, made to the highest standards with components guaranteed to last, coupled with a price that's guaranteed not to be beaten.

1

Modplan are regarded as one of the best manufacturers in the UK and we have partnered with them to make sure our Leekes windows are made to the highest possible standards with the latest in innovation technology and expertise. Leekes windows are manufactured in a dedicated factory with excellent quality control measures in place.

2

3

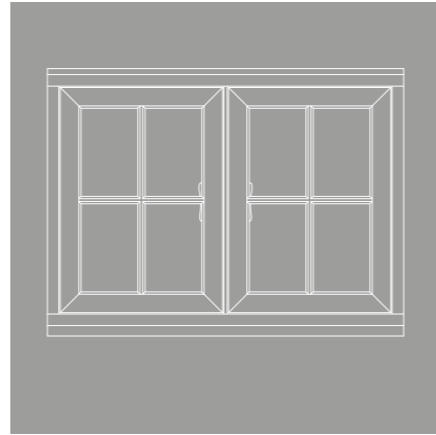

We carefully evaluated all the premium glass suppliers to choose our partner and looked at all aspects of the product we deliver to our customers including sealants and screws to make sure we offer the best products available. These elements make a huge difference to longevity and thermal performance.

4

5

# Our Service

## 1 Choice

At Leekes you'll find purpose built studios showcasing an extensive range of our products to help you find the right design to suit your style and budget. Our experienced consultants will guide you through your choice of designs, colours and finishes.

## 2 Design

Your designer will create a design to suit your requirements which includes a technical specification of products and design to enhance your home.

## 3 Planning

We offer a free no obligation design and planning service. One of our experienced design consultants will visit your home to discuss your ideas and measure your space. Alternatively you can visit your nearest showroom with your measurements.

## 4 Survey

When you are ready to proceed with your project our designer will confirm the design and price, securing your order with deposits from £100. Once this is completed a surveyor will visit your home to confirm that all the measurements are accurate.

## 5 Installation

We offer flexible installation dates to suit your requirements and our installation co-ordinators will ensure the project runs smoothly from start to finish.

## 6 Our Promise

We provide a high quality and comprehensive service bringing a wealth of experience and clear focus on customer satisfaction. For added reassurance we offer a 10 year guarantee on our products and their installation.

# Our Customers

“

Throughout the whole process of quoting, ordering and fitting our windows we felt we were dealing with people who actually cared about our needs which was ultimately reflected by the non-pressurised sales approach. I cannot praise enough the experience we have had dealing with Leekes.

Mr & Mrs Dorrofield

“

From inception to completion the process was made pleasurable and rewarding by a team of caring professionals. We were supplied with the most able and considerate tradesmen resulting in all elements of the work being executed to an extremely high standard.

Mr & Mrs Gunn

# Excellence is our standard

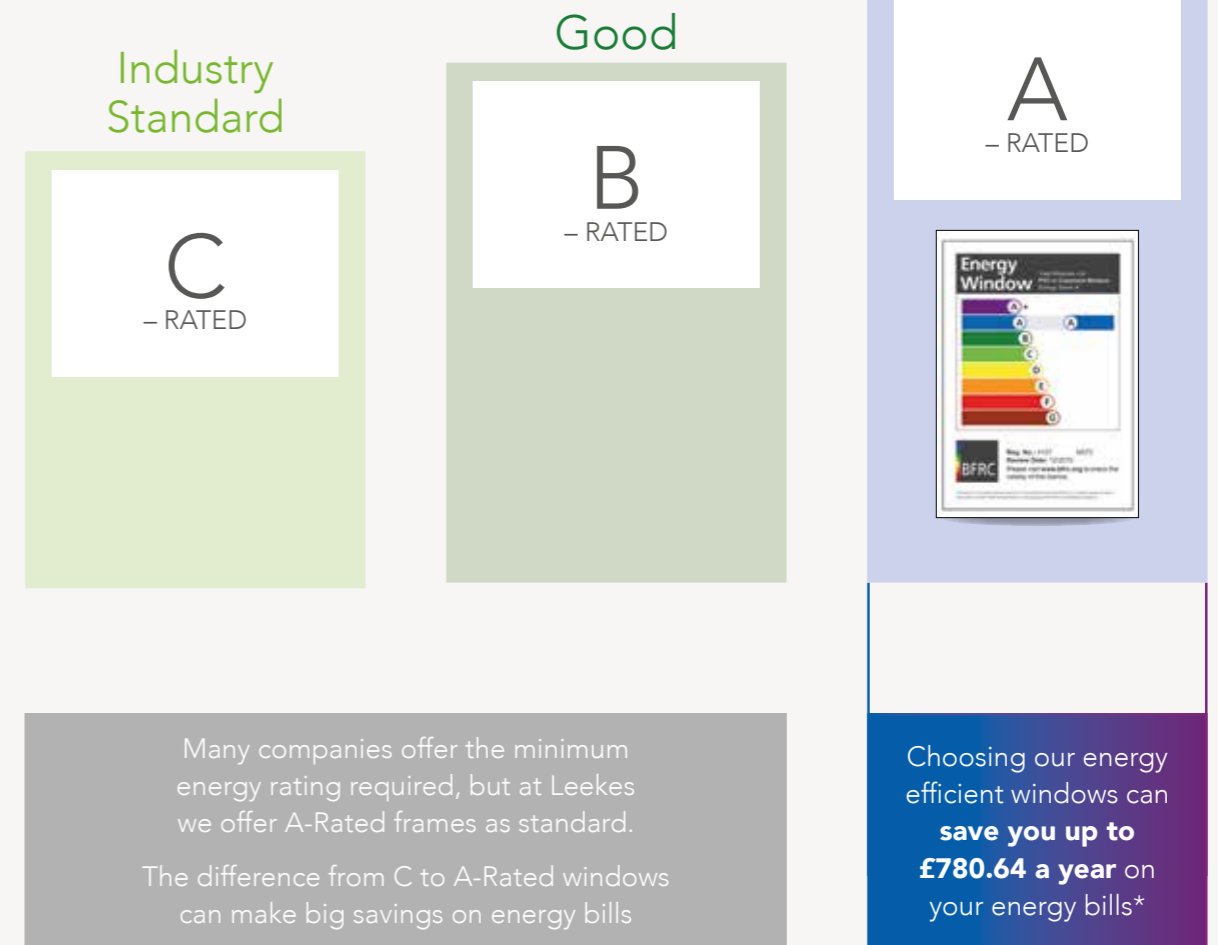

The British Fenestration Rating Council (BFRC) provides an energy rating labelling system that enable consumers to understand and compare the energy performance of any product.

The BFRC label clearly indicates the rating of the designated window (A+ to G) depending on the energy efficiency levels achieved by the manufacturer. A+ is the most energy efficient, G the least efficient. The level of energy efficiency is indicated by one of a range of coloured bars – very similar to the energy efficiency labels found on fridges, freezers, washing machines and other household products.

During the rating process the energy efficiency level is calculated and verified by BFRC who are totally independent from any manufacturing or installing company. Manufacturers of BFRC rated product and BFRC Authorised Installers are audited to ensure that their energy efficient windows are achieving the stated rating. The BFRC energy ratings allow you to compare varying window products and choose the most suitable for your home.

The chart below shows the benefits of choosing our Excellent Energy Efficient windows over the industry standard windows.

\*Based on a detached house with single pane, steel window frames using electric fuel source. Data from Glass and Glazing Federation calculator.

# uPVC Windows

New windows can really enhance the look of your home from both the inside and outside. We offer a wide range of styles to suit both traditional and modern properties and our uPVC Windows are made using the world's best frame in our own British factory.

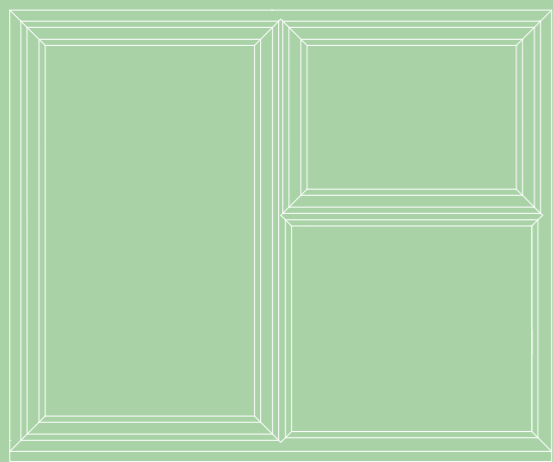

Hugely experienced Design Consultants and a commitment to providing excellent customer service makes Leekes the first choice for windows.

Opt for traditional white frames or a natural woodgrain effect in golden oak, rosewood or mahogany. Choose Georgian, stained, diamond lead or bevelled glass.

Whatever your style, you'll find our windows can be designed to match any property – from a traditional cottage to modern townhouse.

## uPVC Casement Windows

An extensive range of windows and our most popular design.

Casement Windows offer improved security and superior energy efficiency. They are not just aesthetically pleasing, they are practical too and minimal maintenance requirements mean their good looks will last well into the future. With many design options such as decorative glass, Georgian and Astragal bars and Mock Horns, Casement Windows can be tailored to give your home a unique new look.

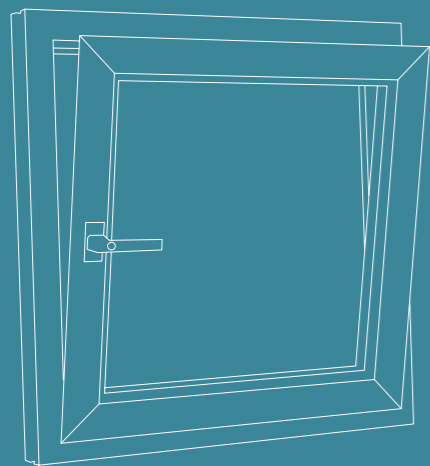

“

I recently had the whole house re-glazed with uPVC to replace very old wooden frames. Leekes had a good, professional service. The two fitters were friendly, experienced and knowledgeable and were able to keep the disruption to a minimum. I was pleasantly surprised at the competitive costs – even against dedicated local glazing firms.

Mr Allen

## uPVC Tilt & Turn Windows

The Tilt & Turn Window allows you to enjoy the benefits of a truly versatile product, offering both aesthetic appeal and practicality.

Available in a number of style options and allowing larger opening areas, this product can even be used for fire escapes. Our Tilt & Turn Windows are available with a variety of glazing options which include Georgian bars, leaded and obscure glass.

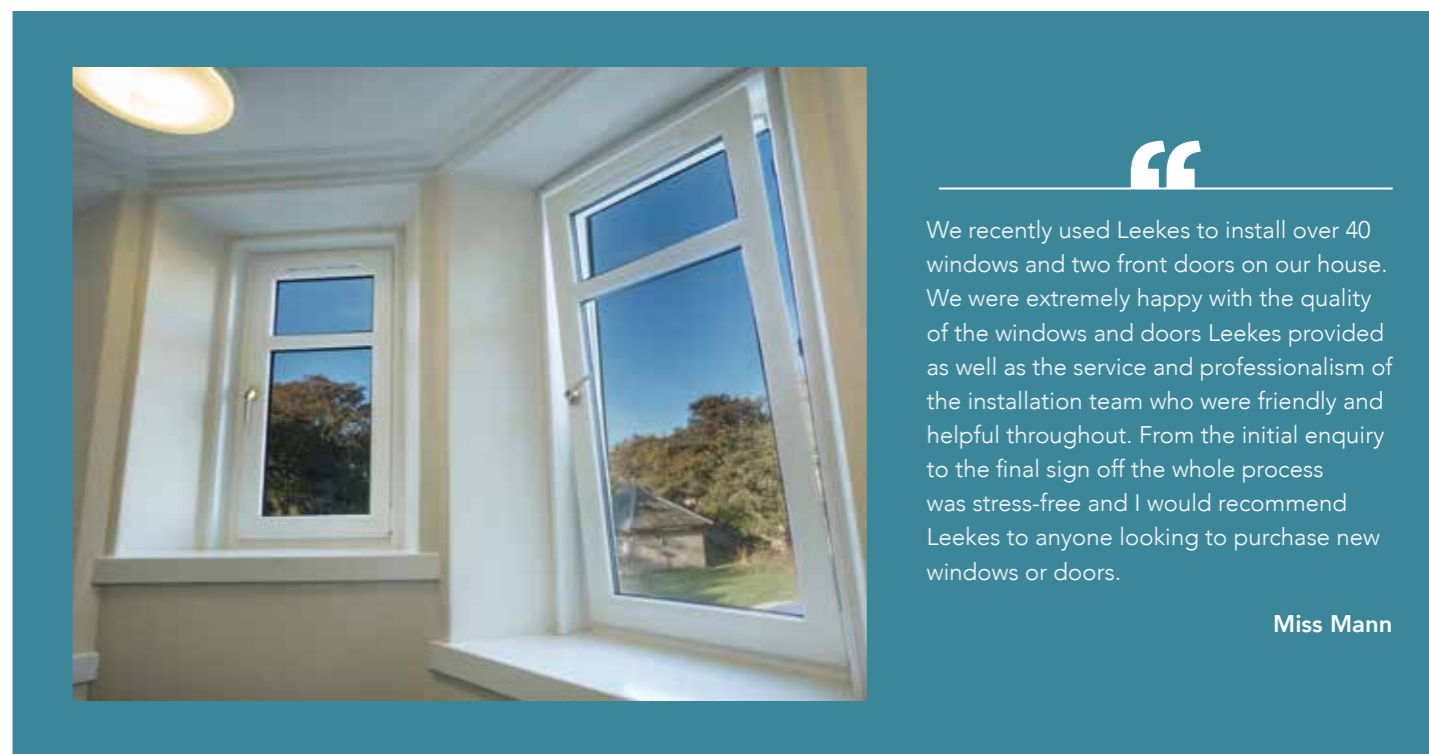

Closed

Tilt

Turn

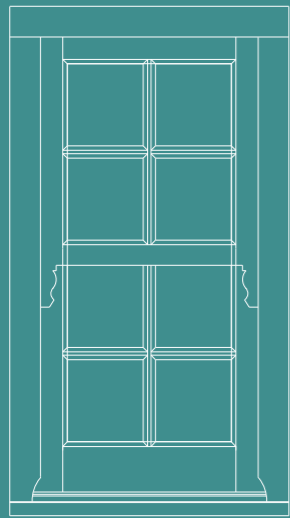

“

We recently used Leekes to install over 40 windows and two front doors on our house. We were extremely happy with the quality of the windows and doors Leekes provided as well as the service and professionalism of the installation team who were friendly and helpful throughout. From the initial enquiry to the final sign off the whole process was stress-free and I would recommend Leekes to anyone looking to purchase new windows or doors.

Miss Mann

## uPVC Sash Windows (Vertical Sliders)

The uPVC Sash Window range combines the elegance of traditional Sash Windows with the benefits of modern materials.

Based on the original wooden Sash Windows from the Georgian and Edwardian periods, the modern version incorporates A-Rated frames and secure toughened glazing while still including the details of the original windows. Upgrade to include Georgian or Astragal bars or leave the windows as single panes depending on your preference.

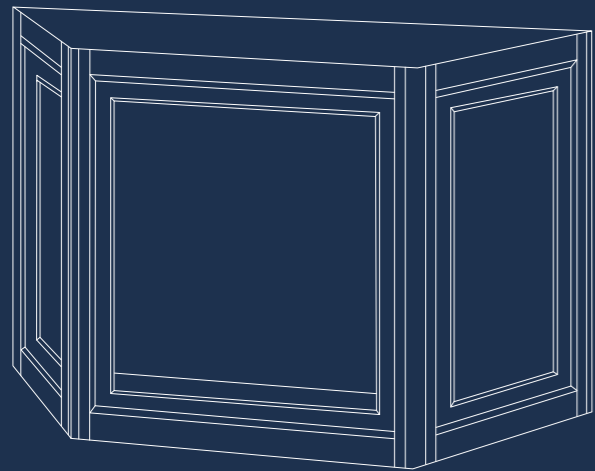

“

We had a conservatory fitted in our previous home by Leekes several years ago. We were impressed by the total lack of ‘hard sell’ – unlike other double glazing companies. When we needed double glazing throughout our new home, we decided to use Leekes again. We are delighted with the quality of the Sash Windows, they are completely in keeping with our Victorian house and look like they have always been there. We would have no hesitation in recommending Leekes to our friends and family.

Ms Hills

## uPVC Bay & Bow Windows

Bay & Bow Windows retain the traditional look of your home creating space, character and allowing light to flood your room.

Our Bay & Bow Windows offer you the versatility of creating the illusion of space and depth by allowing more light into your home without the need for additional building work. All Bay & Bow Windows can incorporate Casement and Tilt & Turn styles to suit your home.

“

From start to finish, our window replacement project was a total success. No pressure, welcoming, customer friendly and professional staff at every turn. We had 13 year old single glazed windows and one French door replaced with modern and attractive double glazed items that have improved the look and feel of the house immeasurably. And of the three quotations received, the Leekes quote was the most competitive and, despite our numerous changes of mind on design and handle colour, Leekes were more than happy to accommodate our changes.

Mr & Mrs Lingard

# Features & Benefits

## uPVC Windows

Our range of uPVC Windows come in many styles and finishes and can be designed to suit any home. They offer high security, energy performance and low maintenance as standard.

### 1 A-Rated Energy

As standard Leekes offer A-Rated Windows in Double and Triple Glazing options. With our high performance energy ratings you can save money on your energy bills.

### 2 Safety & Security

All our uPVC Windows come with Yale lifetime security guarantee for absolute peace of mind.

### 3 Glass Designs

Why not personalise your home with our range of glass designs from leaded options to bevels. We can also provide obscure glass for increased privacy.

### 4 Style

uPVC Windows are available in a wide range of styles to suit your home from contemporary to traditional.

### 5 Colours & Finishes

Colours are becoming more popular and allow you to customise your home, both on the outside and the inside. Choose from our extensive range of 30 colours.

### 6 Handle Options

Our uPVC range is available with a suite of handle types and colours to suit your home and style.

### 7 Low Maintenance

uPVC is a robust and hard-wearing material that requires minimal maintenance. Just wipe clean or wash to keep your windows looking as good as new.

At Leekes our customers' security is very important which is why we offer Yale Lifetime Security Guarantee on all our uPVC windows.

Homeowners worldwide have confidence in the power of Yale to protect their homes and the Yale Lifetime Security Guarantee\* reflects the faith they have in their products.

The Yale Lifetime Security Guarantee\* offers an additional level of reassurance, including:

**Up to £1000 towards home insurance excess**

In the unlikely event of a break-in, Yale will pay up to £1000 towards your home insurance excess to make sure you're not left out of pocket.

**£1000 compensation**

If a break-in is caused by failure of a Yale component, Yale will do all they can to make it right. That includes paying up to £1000 compensation to apologise for the distress caused.

**Up to £1000 towards repairs or replacements**

Yale products are always designed to stand the test of time. That's why if a Yale component fails, they'll pay up to £1000 for repairs or replacements.

**Up to £250 refund on call-out fees**

With the Yale Lifetime Security Guarantee\*, you are fully covered if the worst should happen. They'll even refund call-out fees to secure your home if a break-in occurs due to failure of a Yale component.

\* Terms and conditions apply. Please visit the Yale website for full details.

Make your windows unique or simply add some finishing touches to complement the existing look of your home.

**1 Astragal Bars**

Offer a traditional finish by planting shaped bars on top of the glass panes, creating depth to the design and the look of individual glass units.

**2 Georgian Bars**

Allows you to tailor your windows to create a personal finish for your home. This is achieved by inserting a shaped bar in between the glass panes.

**3 Top Over Fix**

A traditional style casement that complements most house styles and provides safe and secure ventilation.

**4 Runthrough Horn**

Our Runthrough Horn feature enhances the aesthetics of your windows by achieving the appearance of a traditional Sash Window.

**5 Multi Configured Style**

uPVC Windows allows a multitude of configurations to be created to suit any space.

**6 Equal Sightline (Dummy Sashes)**

Dummy sashes are non-opening glazing sections which allow equal window sightlines and are available throughout our uPVC range.

**7 Step Sightline**

Standard uPVC configuration are supplied in stepped sightlines where dummy sashes are not incorporated.

**8 Leaded Glass**

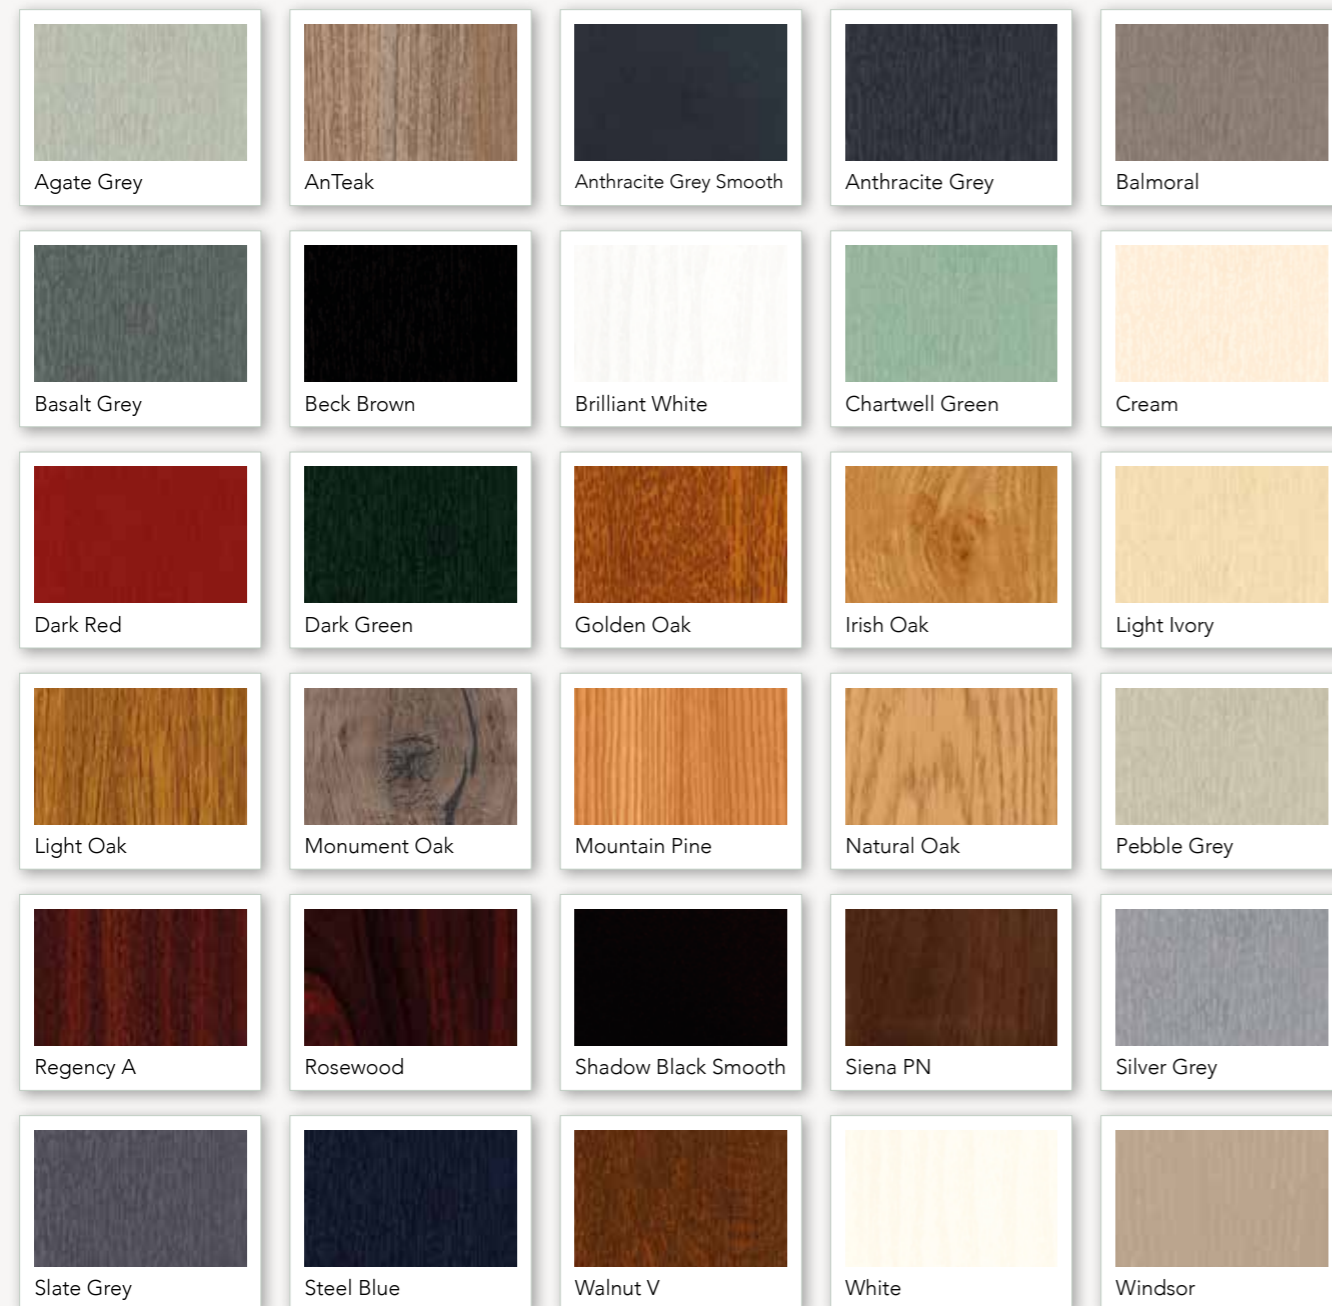

A classic British design that complements traditional and period properties but equally brings a sense of grandeur to modern homes.

# uPVC Colour Options

Our wide choice of colours offer a range of options to match and complement your existing brick colour. Our free quote and design service can give you a visual image of how your finished windows could look in different colours. Depending on your chosen build, design and desired

outcome the colour selected can transform your home into a more traditional or modern look. For example, Chartwell Green or Golden Oak can complement more traditional designs whereas Grey, Black or White can enhance a modern property.

# uPVC Pilkington Glass Glazing Options

A vast array of glazing options are available including patterned, Georgian, stained and leaded. We can help you through the selection process and ensure you choose the style that suits your requirements.

# uPVC Furniture

All of our hardware is available in four high quality finishes designed to complement your home and is complete with a 10 year guarantee.

## Standard Handles

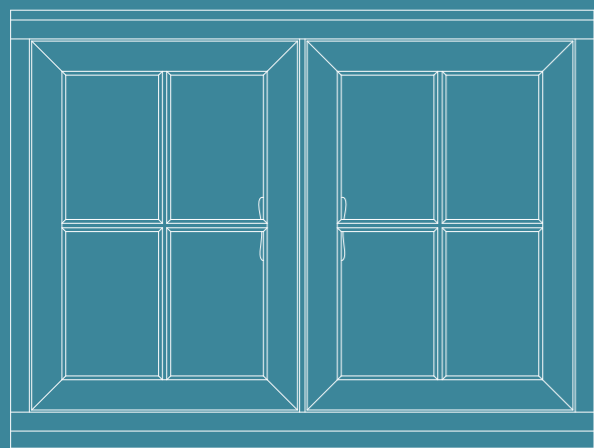

## Signature Handles

Heritage Range hardware is also available. The 'Monkey Tail' design is not only aesthetically pleasing but fully functioning.

# Flush Windows

Where tradition meets technology with a simple and elegant aesthetic.

Designed to create a stunning focal point and featuring traditional aesthetics, the Flush Window is ideal for properties that are replacing original Timber Windows, or for those wanting an authentic look, but wish to take advantage of modern window technology. Flush Casements are a timeless, elegant window solution with openers that close fully into the frame to deliver a beautiful flush appearance.

“

Thank you so much Leekes for fitting our windows. The two fitters have been a pleasure having around and a credit to the company. We had a few problems with our house being 17th century, but nothing fazed the fitting team and the workmanship they produced was second to none. My windows are better than I ever imagined and look like painted wood, just how I wanted.

Mrs Shorthouse

# Features & Benefits

## Flush Windows

Our Flush Windows offer you a true timber aesthetic but using modern materials to combine high performing security and energy, with a traditional heritage appearance. The Flush Window design fits within the outer frame to give a clean and simple finish.

### 1 Traditional Timber Styling

With the traditional Flush Window, you can achieve the authentic look of wood but without the constant yearly maintenance such as sanding and re-painting. The innovative woodgrain effect ensures a realistic timber finish and a virtually maintenance free window.

### 2 Real Wood Aesthetics

The authentic looking wood grained finish requires minimal maintenance and has the highest performing modern technologies. We also offer a colour matching service so any RAL colour can be produced – simply talk to one of our designers about choosing a bespoke RAL colour.

### 3 Handcrafted Finish

Each window is handmade in our specialist factories and with every section of the window put together by hand you can be sure of a product with superior quality, made by an experienced team of trained and knowledgeable craftsmen.

### 4 Handle Options

For total peace of mind our handles do not compromise on performance and security as every handle comes with secure locking built in as standard. Choose from traditional, standard and contemporary designs from our handle collection.

### 5 Safety & Security

All our Flush Windows come with Yale Lifetime Security Guarantee for absolute peace of mind.

### 6 A Energy Rating

With an exceptional A-Rating as standard, the heat generated in your home will not be able to escape with the highly energy efficient Flush Window. Your bills will reduce in cost and your house will stay warm and cosy for years to come.

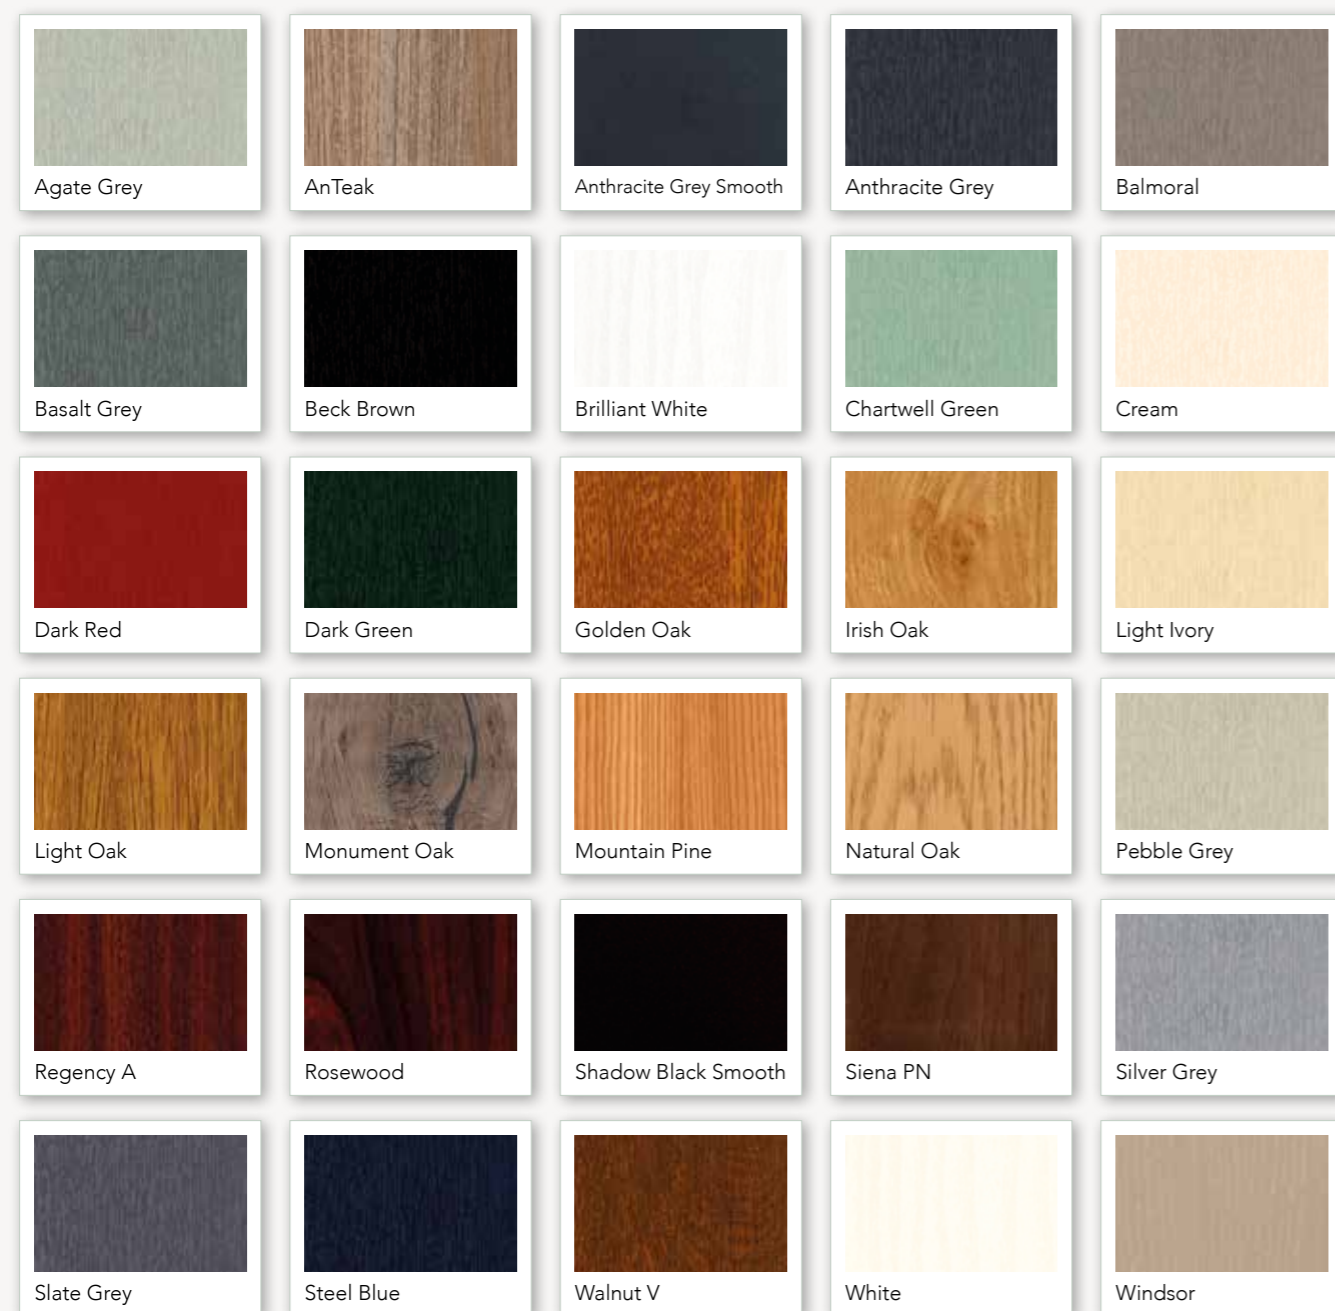

# Flush Colour Options

The standard internal colour for Flush Windows is white PVC. This beautiful combination ensures that the internal face is neutral and will complement any interior design styles. Should you wish to have both sides of your windows featuring a foil colour finish, this can be customised. In

addition to our collection of foils below, we can also paint your windows to one of over 200 RAL colours using our in-house colouring facility. Our painting process, which is an optional upgrade, involves applying a hard-wearing coating that has a guarantee of 10 years.

# Flush Design Features

Every inch and contour uses the absolute latest in technology for exceptional performance.

## Beautiful Sightlines

Equal and perfectly balanced sightlines and frame proportions to deliver a greater glazed area allowing more light into your home.

## Radlington Cill Detail

Radlington cills have been developed to authentically replicate the depth of a traditional timber cill, seamlessly blending in with the window design.

## Classic Georgian Bar

Our Georgian Windows replicate the appearance and proportions of a traditional Timber Window with the authentic Georgian bar.

# Aluminium Windows

From a traditional country cottage to a contemporary townhouse, our aluminium range of windows offer style and elegance.

Aluminium is the preferred material of astute architects looking for longevity, performance, good looks and superb lifetime value for money.

Ultra-slim frames allow more natural light into each living space enhancing the outdoor views.

Leekes Aluminium Windows are made to measure and each window is manufactured using the very latest technologies and processes to create the finest finish. Available in two styles – the elegantly sculpted traditional and the square-edged contemporary, these exclusive super-slim windows will provide a stylish facelift for any home.

# Features & Benefits

## Aluminium Traditional and Contemporary Windows

Our range of Aluminium Windows will suit both traditional and contemporary homes and are now available with a range of slim sightlines, colours and finishes.

### 1 Slim Frames

Slim and strong aluminium frames increase the ratio of glass to frame therefore letting more light into your home. The strength of aluminium allows frames to be up to 50% slimmer giving a super-sleek look. Clean joints and subtle lines offer an exceptional finish for homeowners to admire.

### 2 Colour & Finish

Available in 3 standard colours; white, grey and black each Aluminium Window is powder-coated to give one of the most durable finishes available. The high quality colour process will not discolour, rust or peel giving it an attractive appearance for longer. There is even an option for a 'marine grade' finish for those who live near the sea.

### 3 Window Systems

Your Leekes designer will help you decide which window system is appropriate and explain the differences. There are two contemporary systems and three traditional systems and all achieve the same level of security and energy-rating performance.

### 4 Safety & Security

Aluminium Windows incorporate many security features as standard. Each lock has a combination of hooks and anti-lift bolts with high-security hinge guards available across the range. You can also keep your family safe with restrictor hinges to prevent the risk of falling.

### 5 Design & Hardware

Hardware is available in a choice of finishes allowing you to tailor your windows to suit your interior. For a truly traditional look, tailor your windows with glass decorations such as Astragal, Georgian or decorative lead bars. Optional easy-clean hinges let you slide your window open to one side allowing you to easily clean both sides.

### 6 A Energy Rating

Aluminium Windows achieve a window energy A-Rating when used in conjunction with the correct double or triple-glazed unit. Enhanced with polyamide thermal barrier technology, solar heat is kept out in the summer and radiant heat kept in during the winter.

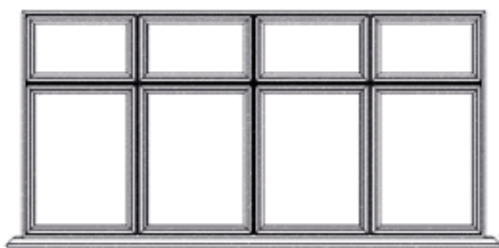

# Aluminium Design Features

Your Leekes designer will explain the differences between window systems and help you decide which is most appropriate for your project. All window systems achieve the same level of security and window energy rating performance with the main deciding factor between an externally and internally beaded window design preference.

## Dummy Sashes\*

If you have an eye for detail you may wish to consider 'dummy sashes' to give that truly symmetric design. Window styles that have a combination of opening and fixed areas can look a little uneven due to the frame design. A dummy sash allows you to balance the sight-lines and create a more uniform look.

\*Required for system 1

Optional easy-clean hinges let you slide your window open to one side allowing you to easily clean both sides of the glass from inside the home. These have the added benefit of opening to almost 90° giving an unobstructed view from your room and creating an easy fire exit.

Easy-clean Hinges

Satin Silver

Polished Gold

Antique Black

For additional security and to retain the slim sightlines, system one has been designed with a handle block manufactured into the frame which will appear as a separate section when viewed internally.

# Aluminium Glass Options

For a truly traditional look, tailor your windows with glass decorations such as Astragal, Georgian or decorative lead bars.

“

We would like very much to express our complete satisfaction with the double glazing installed by Leekes recently. The finished product was absolutely perfect inside and out and we cannot praise their work sufficiently. We have and always will recommend Leekes to anyone requiring high quality double glazing installed to the highest standards.

**Mr & Mrs White**

“

It was a pleasure to deal with Leekes, from the very start all staff were polite and helpful and there was no hard sell. The fitters were on time every day, very honest, very clean workers and all round extremely pleasant. The after care is great and I am delighted with the job and the company.

**Mr & Mrs Bryant**

“

At each stage in the process of installing new windows and doors to our property, Leekes have done a fantastic job. From initial discussions in our local showroom, to the sales team, surveyor and finally the installation we have been extremely pleased. The installation team in particular took great care and attention to detail and we are delighted with the finished product which has greatly enhanced our property.

**Mrs Lampard**

“

Leekes installed a total of nine windows for us and we found the whole process very easy to deal with. All the members of staff were very helpful, friendly and informative. The product is excellent and the final finish adds a fine aesthetic to our property. When ordering we requested different colours inside and outside for some windows, this was no problem. We are highly delighted with the service we have received from Leekes.

**Mrs Wishart**

“

My wife and I wanted to purchase uPVC windows and doors including one oak coloured composite front door. We received four quotes from different companies including Leekes. We visited the showroom and were won over by the lovely designs and excellent quality of their products. I must say the new windows and doors must have added value to our property, they look awesome. Would we recommend Leekes for windows and doors? Yes we would 100%.

**Mr Gunter**

“

Before we chose Leekes we researched many other window companies and we found the quality poor and the price unbelievable, we found Leekes had a truly outstanding product and was very fairly priced.

We must mention the installation team Steve and Dan because, as Company Directors ourselves we have never seen workmen who work 10 to 12 hours per day then fully vacuum and clean up each night before leaving the site, without doubt two of the best guys working for this hard working company.

**Mr Duffy**

# FAQs (Frequently Asked Questions)

How long will my windows and doors take to install?

This will depend on your chosen design and product type but an average timescale is six – eight weeks from start to finish. Aluminium and special order colour foil windows can take slightly longer due to the more complex manufacturing processes involved.

How energy efficient are Leekes windows?

Our windows are all A-Rated as standard and designed to retain heat and energy in the winter. You can upgrade most options for increased thermal performance.

How much will my windows cost?

Every project is different and your choice of optional extras such as colour, glazing design and acoustic performance will all affect the price. We are confident that our prices are extremely competitive and our Lowest Price Guarantee means we will also match any proven like-for-like quote.

Who can I contact if I have a question?

Your project will be overseen by an Installation Manager and a local team in each location. We provide you with the numbers of both so you may contact them during standard office hours with any questions. Our stores are also open seven days a week and are available for you to contact.

Do the fitters work for Leekes?

All our tradesmen work for Leekes. We train them to be able to install a range of products and ensure they are certified as official Fensa installers. This training and testing means they are fully qualified with a proven track record. As our installers, their work is fully guaranteed by Leekes, giving you complete peace of mind.

What happens to any building waste?

Leekes dispose of all waste from the site leaving it clean and clear. We take our environmental impact and waste management seriously which is why 100% of our uPVC is recycled and we have been awarded with zero landfill certification.

Who do I pay for the work?

You will only pay Leekes which means you do not have to make multiple payments to a range of tradesmen.

Are there any hidden costs?

There will never be any hidden costs or fees. As long as there are no amendments to the original design, your quoted contract price is what you will pay once it has been confirmed after our surveyor has visited your property. The quote is valid for 30 days providing you with time to consider your investment.

Will I need planning permission?

We will advise you if planning permission is needed and if it is, we will take care of the application for you.

What about sound reduction and condensation?

New generation A-Rated windows offer improved noise reduction. We also have an acoustic glass upgrade if you're in a particularly noisy area. Condensation can be reduced by new windows although it is not uncommon to see this appear on the outer pane.

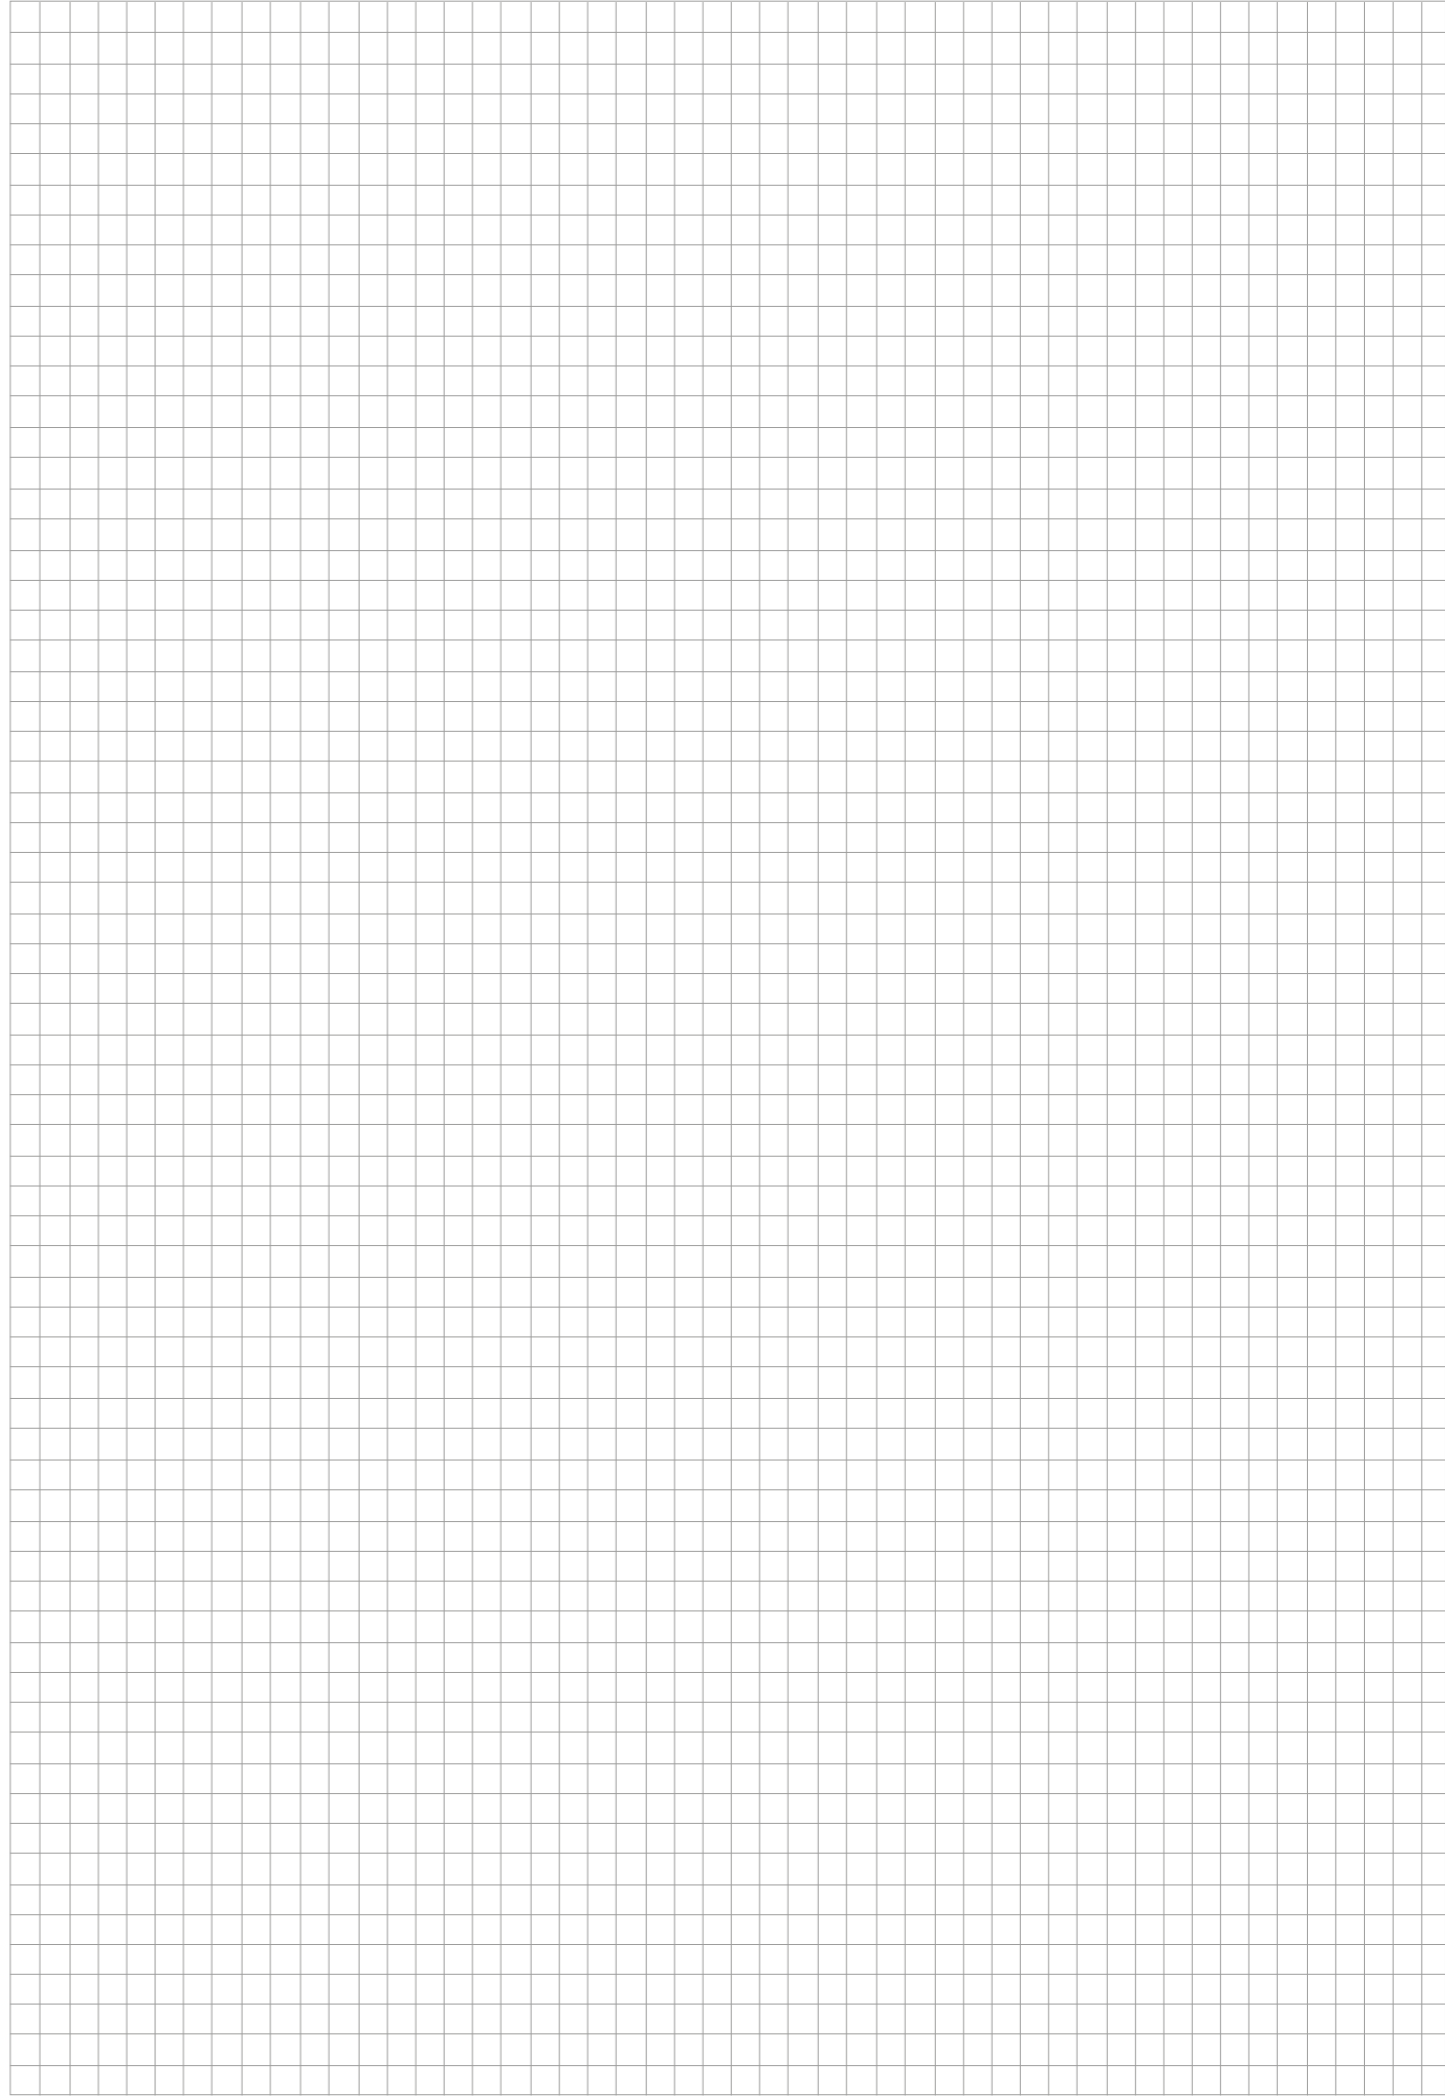

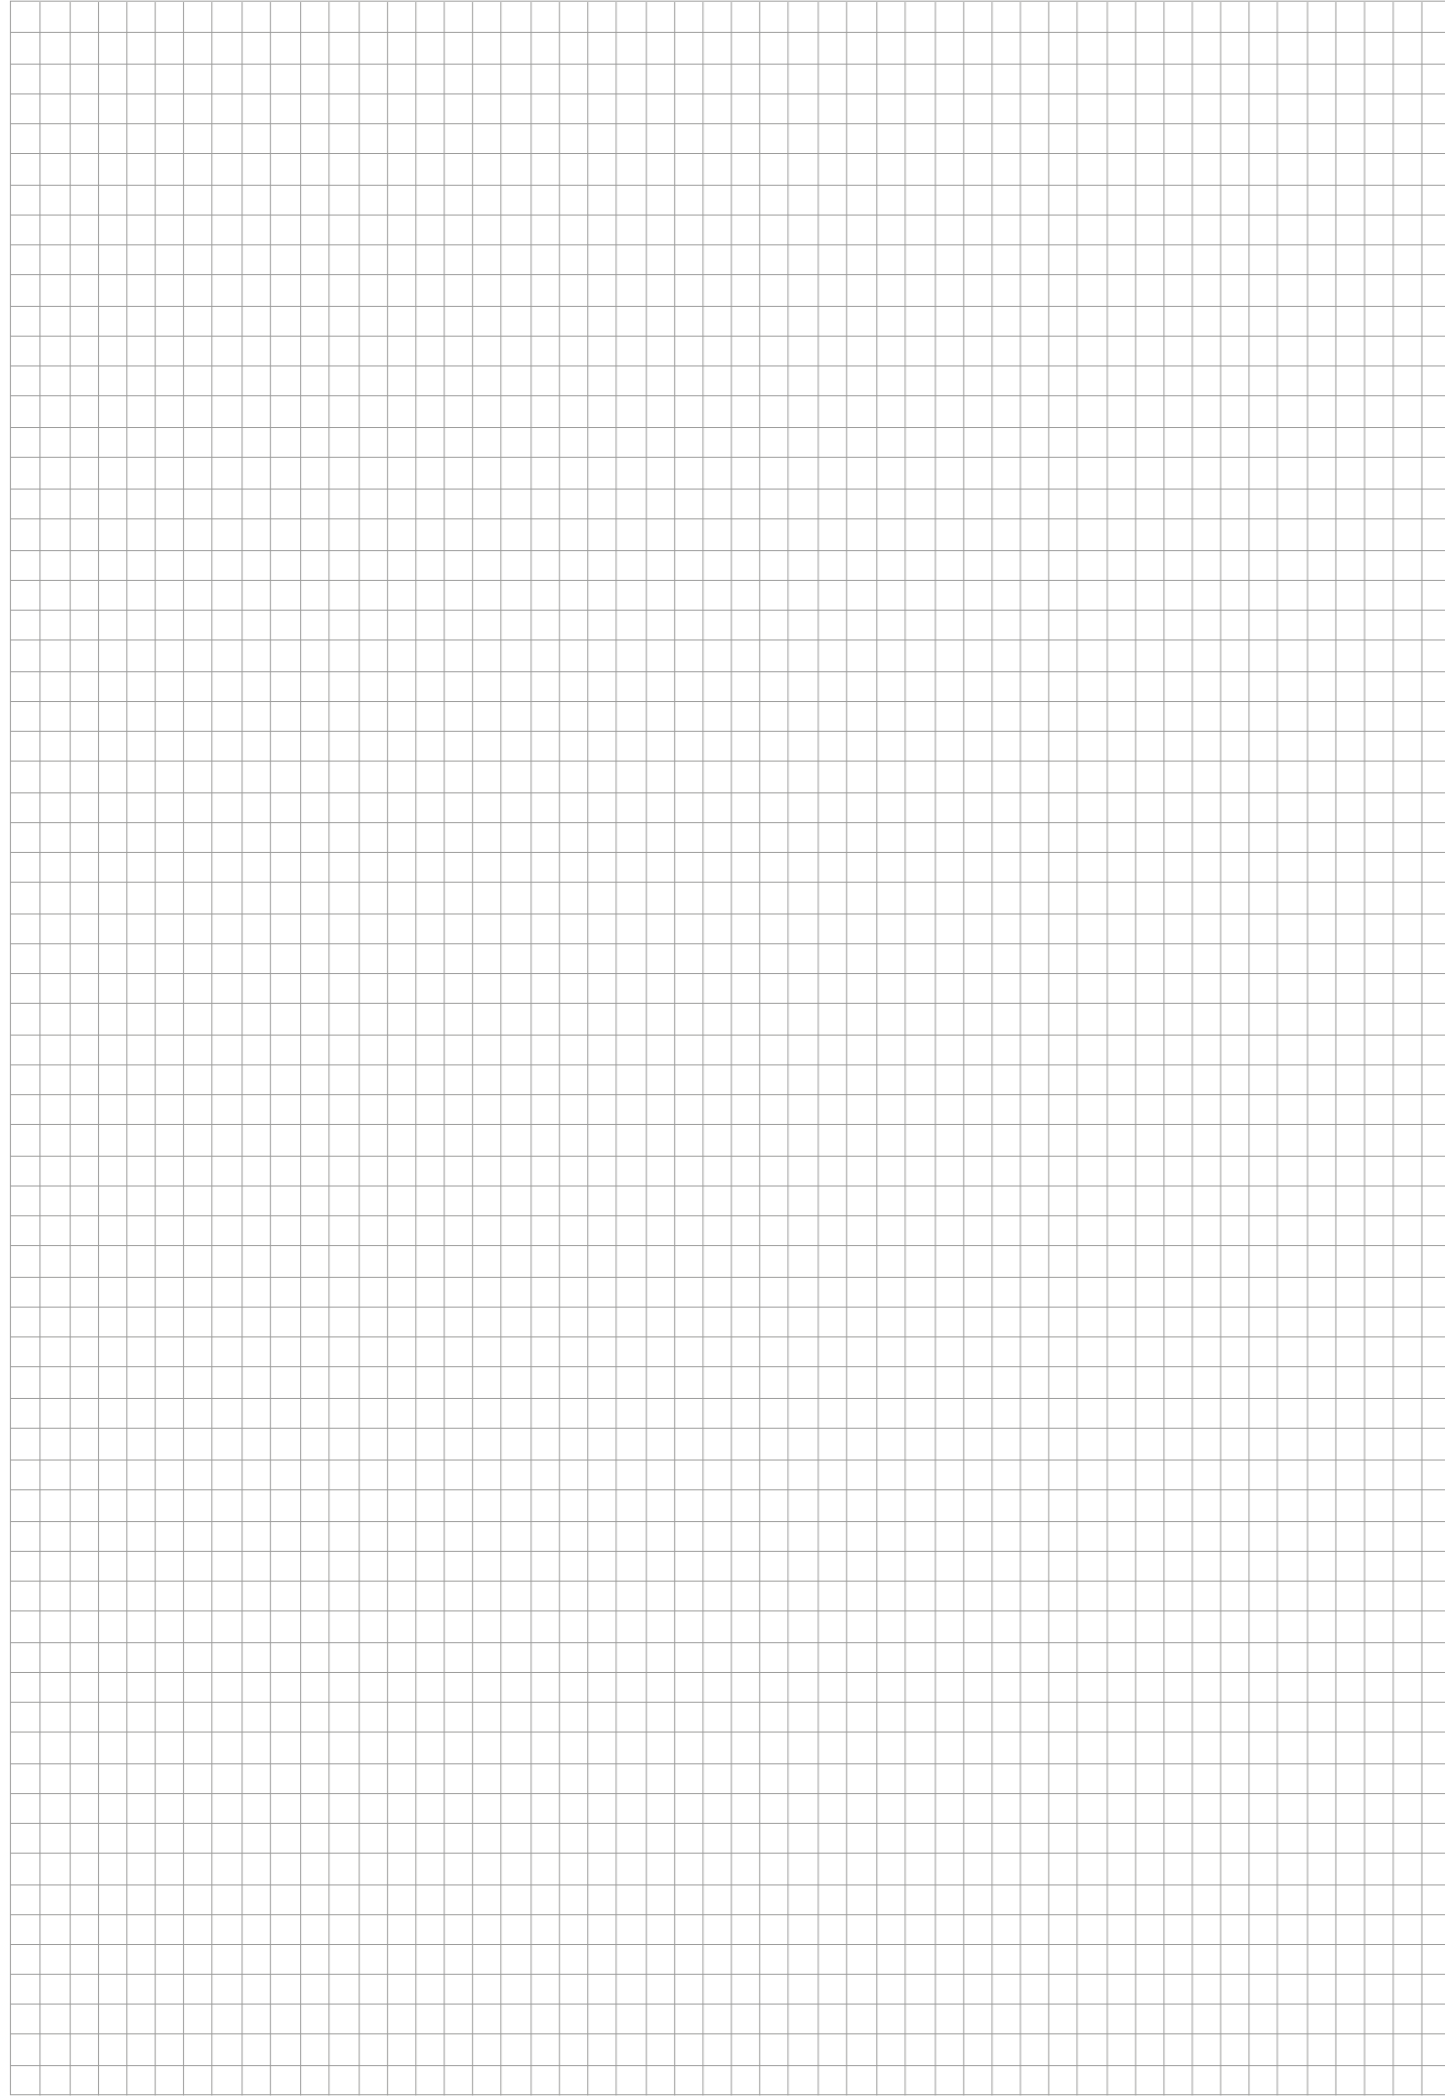

What are the payment options?

Deposits are from £100 with the balance paid on completion. If you would rather spread the cost, we offer a range of affordable finance options. All finance is subject to status and you can refer to our website for our latest finance offers.
